Update – Suspect Arrested for the Murder of Kayla Hamilton

A seventeen-year-old Hispanic male has been arrested for the July 2022 murder of 20-year-old Kayla Hamilton.

An extensive investigation was conducted by the Aberdeen Police Department Criminal Investigations Division who was assisted by the Maryland State Police Homicide Unit, U.S. Department of Homeland Security, and U.S. Immigration and Customs Enforcement.

Hamilton's death was determined by the Office of the Chief Medical Examiner to be a homicide by strangulation. Detectives learned from Hamilton's family that she was autistic and had recently moved to Aberdeen with her twenty-two-year-old boyfriend. Early in the investigation, a seventeen-year-old male became a person of interest and was later determined to be an undocumented non-citizen from El Salvador. U.S. Immigration and Customs Enforcement was able to verify that he was also listed in El Salvador as a member of Malva Salvatrucha 13 (MS-13). The suspect's DNA was compared to evidence recovered at the crime scene by the Maryland State Police Forensic Sciences Division. The test results led to the issuance of an arrest warrant for First Degree Murder on January 14, 2023. The suspect was apprehended in Edgewood, Maryland during the early morning hours of January 15, 2023. He is currently being held without bail at the Harford County Detention Center.
